Rohner's automated powder system features a 15-foot-tall part window and can handle up to 1,000-pound tube steel weldments on a power and free conveyor. Elevators transfer product to a vertical configuration, reducing the overall system footprint by 60 percent. This tall challenge is met with the company's RM Series reclaim powder booth, reciprocators, and automatic powder guns, which coat product prior to entering a Rohner convection oven with energy saving air curtains.
