 **FABTECH**  
MEXICO

The biggest metal manufacturing event in Mexico will bring together more than 575 exhibitors and cover over 140,000 net square feet of show floor. FABTECH Mexico 2018 will be held May 2-4 at Centro Citibanamex in Mexico City, Mexico. With more than 13,000 attendees from Mexico, South America, and other countries, this is an ideal event to experience and learn more about the latest innovations in the metalforming, fabricating, welding, and finishing industries. No other event offers a better opportunity to network with experts and professionals from around Latin America.

The event is comprised of four co-located shows: FABTECH Mexico encompasses metalforming and fabricating as well as tube and pipe technology; COATech focuses on finishing technology; AWS Weldmex features welding technology; and METALFORM Mexico highlights metalforming and tool and die technology. Sponsoring associations are the Chemical Coaters Association International (CCAI), Fabricators and Manufacturers Association International (FMA), SME, American

Welding Society (AWS), and Precision Metalforming Association (PMA).

FABTECH Mexico 2018 will offer an array of educational programs to enhance your career or your business. You can network with peers, learn from top industry experts, exchange best practices, and explore the latest technology and advancements in the industry. Session topics will focus on finishing, forming and fabricating, lasers, lean management, software, automation, welding, cutting, and stamping. Conference sessions will be held on the show floor and are free to all registered attendees. Sessions are 25-minutes long, will be held on all three days of the show, and are presented in Spanish.

The exhibition will feature booths and live demonstrations from more than 575 companies. Exhibited technologies will include coating applications, finishing, fabricating, powder coatings, assembly, automation, bending and forming, tube and pipe equipment, machine tools, coil processing, robotics, tooling, and more.
